
AI Agent - untrusted, never sees the key
mu-client.py
mu-client.ts
cp1-harness.py - 4 test cases
Offline policy management (Composer C2)
composer-cli - whitelist and limit management
composer-tauri - desktop UI
composer-core - Delta proposals encode/decode
policy updates
policy.toml - daily budget / whitelist / per-resource price caps
mu-policy (M2/M3)
auth / rate-limit / allowlist
mu-gate (M8) - Unix socket + ed25519 auth
mu-runtime (M6) - pipeline
Omega ceiling check
reads rules
Delta rules check
mu-human (M9) - biometric confirm above threshold
mu-log (M5) - append-only hash-chain WAL
execute
anchor intent
mu-connect (M7) - settlement
stub connector (dev, no real payments)
sui connector
reconcile
EVM USDC connector (M7a) - Base
x402 client (M7x) - EIP-712 / EIP-3009
signs, key never leaves
KSG edition - planned, for keysingate
mu-ksg - Solana anchor tx, SPL Memo only, fee only, no money moved
Solana - network fee per anchor
Trust anchors
mu-license - ed25519 license check
mu-core (M1) - mu-object format
mu-daemon - boot protocol + socket server
mu-vault (M4) - k256/P-256 keys, soft vault / enclave
signs, key never leaves
confirm
External world
Owner - writes policy, confirms biometrically
x402 paid resources (e.g. CoinGecko API)
Base chain - USDC, zero gas fees for owner
